

## FROM PLEIADES TO EARTH - UNITED FEDERATION OF PLANETS - EXPERIENCE OF AN E.T.

Conocimiento Pleyadiano

1 October, 2021

Video URL: <https://youtu.be/WuaO3AoAa2A>

In this video, Anéeka of Temmer explains to us what training they received on the Taygetean planets before coming to Earth, and what situation she encountered once here and after studying Earth living in orbit for 5 years.

### ESTEL-LA - PRESENTATION

Hello everyone and welcome to Pleiadian Knowledge. I am Estel·la. Anéeka of Temmer for those of you who do not know her, is a woman from the star Taygeta in the Pleiades. She reached the orbit of the Earth in 2016 and since then she has been training and has been learning many things, as well as many other races that are also in our orbit and observing what happens on this planet. She also has a very important position within her team, as she is the Chief of Intelligence for the ship. In this conversation you are going to see that she explains to us what information she had before arriving here and after these 5 years in orbit, which is all she has observed and what I have learned is happening on Earth, but you are going to see that It is not simple at all, but it is a set of multiple factors and in order to better understand what is explained, I recommend that you have seen the different videos that you can find in the Orion Wars playlist as they deal with our ancient history . In addition, also to know the functioning of the collective unconscious.

In addition, there is also a video that we are working on which will be available soon, which is titled 'The Creation of the Cabal and the Planet Earth', which will also help us to understand this more deeply. So with all this I leave you with the conversation. Thank you all for always being there and listening and we will see each other in the following videos.

*"This information is provided by extraterrestrial persons, women and men from the Taygeta star in the Pleiades cluster, through a written contact with us."*

\* \* \*

## CONVERSATION WITH ANEEKA OF TEMMER

Estel·la.- What kind of information do you receive before coming here? Something general that all of you have had to learn or pass, or is it not necessary, since each one brings what they have learned, of their interest that already contributes?

Anéeka of Temmer.- We received very complete information about stellar travel, the situation on Earth, which other races will be with us and our relationship with them. And you come here to learn in the process. Ships are schools too. Although learning never stops, nowadays, only experienced personnel remain on this ship given the situation.

Cristina.- And what was your preparation to contact humans?

Anéeka of Temmer.- We didn't have any, on the contrary. It is assumed that since it would only be by technological means, we who were in the 'first contact' project, would be the ones to say or write those contact guidelines or protocols. But face-to-face contact does require training in self-defense and wearing the correct equipment, as we expect humans to be hostile. We wear a full spacesuit that has anti-ballistic and anti-energy weapons protection systems, communicators, remote ship controls, trackers and in some cases weaponry.

Estel·la.- When you contact a person from Earth, what are your goals?

Anéeka of Temmer.- Just say: 'Hello.' Whoever knows that we exist and that they are not alone in the universe. Only that. We only share the little or much that we can know, as you do the same, it is the same.

Cristina.- And how do you learn the language? Do you do any training or is it also practical? What about culture? I remember you explained that with telepathy it was easier to learn a language.

Anéeka of Temmer.- We learn in the Academy everything related to the culture with which we will live. This happens with all of them, not only with the Earth, and it is thus where people who already know one language or another will teach that language or languages to those interested, and yes with telepathy it is faster and easier to learn a language. The problem is that you also learn what is wrong, because you learn to speak the language as your teacher understood it. This is why some people labeled the English we speak here as Taygetean English because we all have a distinctive flavor of how we structure languages, not just English.

Cristina.- In your case, how did you learn Spanish?

Anéeka of Temmer.- I learned it from a holographic computer in Temmer at the academy before coming here, and I ended up perfecting it already here online. And depending on the languages that each person masters, they will be assigned to some task or another, this especially with the 'first contact' project.

Estel·la.- What tasks, for example.

Anéeka of Temmer.- I mean that if you speak Russian they will assign you to Russian social networks and everything that has to do with that culture. As logic indicates.

Estel·la.- And to have a clearer idea of what education is like in Taygeta, could you explain a little bit how you came to have that curriculum? Above all, what you explained to us about yourself, knowledge in medicine, head of intelligence and much more in 22 years, is it because you already know part of this knowledge from other lives?

Anéeka of Temmer.- Medicine was already on the ship helping Senetre and because I was interested in the subject. So for the last four years I have been studying medicine. This is how it works with everything, you learn whatever catches your attention the most and that also gives you the flexibility and responsibility that this brings to train you as a person, how you will be and what knowledge you will have. As for languages, I was interested because it has always been easy for me to learn new languages and it was what I decided to have as a basis for or before coming to Earth. The ships are not only ships and that, but they are also schools. But in general, in my culture you learn that way, on the go. The student is the one who says what he wants to learn, and he does it because it is fun to him, because he sees the utility.

Very few things are mandatory, for example, it would only be the survival skills that they teach you when you are a girl, that is taught to children in general, but that is necessary and logical. Learning a subject that interests a person will inexorably lead him to the fact that in order to advance in that same subject that interests him, as he gains knowledge on the subject, he will need more subjects, more things or different branches of knowledge to nourish him and serve as a basis for him to continue expanding.

For example, children are not taught more than basic math, but later, wanting to learn something else that interests them, sooner or later they will see the need to learn advanced math to continue to achieve their goals. Then, a knowledge or a topic that interests a person as they progress, it will be inevitable for them to acquire more types of knowledge, other topics, because everything is interconnected anyway.

It is difficult for me to know what I have from past lives and what I have accumulated throughout this one, but I know that all people carry and bring knowledge of all their past lives. Some are more noticeable than others, such as in musical instrument skills or advanced mathematics at an early age. Again the clearest example is Yázhi Swarúu. It is not possible that she accumulated such knowledge at such a young age.

Estel-la.- So, in Taygeta, you don't have anything like universities, or specialized courses?

Anéeka of Temmer.- Yes, there are academies of one subject or another, but they are practical, they accept people who are interested in that subject and during their stay this is where they learn the trade or science, leaving personal motivation of each one to study the theoretical part that always exists.

Cristina.- And how is the academy? What things surprised you about the culture here that you learned?

Anéeka of Temmer.- At the Academy, which is not in classrooms like on Earth, but in the form of talks or sometimes around a holographic projector, to see relevant images and videos. We were told that it was a Lyrian-based barely industrial civilization, being attacked and conquered by an invading race of Tall Greys and various Reptiles, and that the population would reveal itself soon. And that's what they called the ascension and that we would help and that we would see it.

But they told us that they were being invaded for which Taygeta, in support of the Federation, sent a battle fleet to Earth between 2008 and 2009. But today we understand that what happens here is something much more complex, more complicated, where humans themselves are enslaving themselves and each other. For reasons not only of 3D, but for intentions from above. Being that

they are not victims, as they told us, but that humans are trapped in a loop of experiences on Earth that is turning out to be pathological, sick and sometimes even psychotic, but it is of their own manufacture.

So the attack fleet withdrew in 2017, leaving only a few ships here, 3 large, then 2, and finally only one. Being that the main person who caused the others to leave and that we see that only one is necessary, was Swarúu of Erra, who was the one who explained what is happening on Earth had nothing to do with a classic invasion, but with a sick collective manifestation.

Estel-la.- Because, an Anéeka question, what understanding or knowledge did you have about this moment on Earth before deciding to come here? Because since there is no past or future, surely it was already known that this would be happening

Anéeka of Temmer.- We would know if it was linear, but time is not. So, although you can see what happens in a line, if you return to live it everything changes and just for the simple fact of observing it. So, although there is time travel as something routine, here, even so, it does not modify what was said before that things only happen once. Because if you go back to live them again, which you can, only as you saw it and you wait for what happens, what happens again, you change it and it turns out different each time.

When I came here it was on promises to witness a great awakening of humanity and its liberation from its oppressors, an ascent to interstellar 5D species. However, after four years here, since I arrived nothing has been accomplished. Or not yet, but I do see big differences between what they tell you at home that happens on Earth and what really happens here. I thought it was something to celebrate, and that I would only be a spectator. Although it helped a little through communicating with humanity, with the project, 'first contact'. Hoping to find a receptive humanity eager to know about other civilizations that can serve as a model to advance theirs. But I find that the vast majority of humans don't care or believe that another civilizations even exist, or that I exist, for that matter. And I find that the vast majority of humanity is not under the yoke of invasive oppressors, but rather trapped in their own creations and nightmares. And that is why the seeds are also trapped, they know that they are not from there because they are immersed in the common frequency of the population that drags them down to have the same end as themselves.

They promised me one thing and I found another here. Everything is supposed to be jubilation, more for people like me, looking from above like eyes in the sky, comfortably in our large ships all equipped. But I find that the ship is too small for me, I feel trapped in a floating can, where not much happens every day. And the joy that was supposed to have been, replaced by frustration and despair, with the helplessness of not being able to help because the bulk of the population does not want to be helped. And that it is highly stressful for me to be here looking and connecting with people that I ended up loving as a family, but I see them exposed below. It has been and continues to be a very hard experience for me. What affects me the most is that humanity asks for everything that happens to them as a mass, blind to the obvious, I don't understand it and that hurts me.

Estel-la.- And what do you think altered that path of awakening humanity?

Anéeka of Temmer.- I don't think the path has been altered, but rather a general misperception on the part of many races observing humanity. It is still believed, that is, many believe that they are invaded there by Reptilians, Archons and others that exploit them energetically. I do not deny that. But we have found mainly through the work of the Swaruu's that higher up, the exploiters are again the humans who themselves generate their exploiters, leaving them like a sandwich in the middle with humans as oppressors on both sides. That is, the human being is oppressed by regressive races, especially the human race, and at the same time these are being generated by the same desires of the mass of humanity, being also manipulated and generated by the desire of the masses.

Then, we realize that there is nothing to liberate, not as oppressed people, the only thing to liberate are consciousnesses and minds. But ... and that is when you despair, they do not listen or are not interested in listening to even the most basic things to improve their lives, much less more advanced concepts. I know many do listen OK, but they are seeds, not exactly human. Like-minded communities on Earth that are noted starseeds, however few or who are awake, have a clear tendency to seek out and cooperate with each other, while the average human will only obey the rules of the Cabal and be plunged into separation.

Estel-la.- Sure, I understand. But then, going back to the propaganda they made to you, for example, is it from the Federation? With what intention? Because now, for example, you are causing them problems.

Anéeka of Temmer.- Because the Federation, in let's say the recruitment center using human words, since it is not recruitment like on Earth, they tell you that humans are being liberated and that you as a Taygetean help them to wake up against their captors and liberate themselves as a race, then you come here to help with liberation thinking in a simplistic way of: 'human victims against the oppressor perpetrators.' But once here you realize that there are no victims, not at the causal level of the problem, only bad vices within the same souls. In an eternal cycle of misinforming each other, creating dynamics of 'I do something to you, now you are a victim and now your victim will seek someone to take revenge against.' Only by making themselves compatible with their own creations or tulpas that exploit them. Call it the Illuminati, Masons, Cabal, whatever came out of the humans themselves.

By this I do not mean that there are no victims objectively, there are, and that lends itself to more misinterpretations. But the problem does not end there. It is not looking for the culprits and the problem is over, but the victims themselves generate their aggressors because, in many aspects of the Law of Attraction or the Law of Mirrors. Because if they are only victims and only suffer, they will only see that they suffer and that they are victims and logically they will only attract more of the same. That is why there is nothing to liberate here, only minds, consciousnesses, but those same minds and consciousnesses are the ones that in turn create control or protection mechanisms so that outsiders like us, like Swarúu, the others, or like me, cannot even introducing concepts like the ones above with a view to breaking out of their self-generated loop of self-destruction.

Estel·la.- But I don't understand why they would say that propaganda by the Federation if now, for example, they can be seen as such captors.

Anéeka of Temmer.- In many ways, the highest controllers of the Earth, discarding the stance of souls that they know before incarnating, are from the Federation, they are the hidden owners of the Earth, as Salvador Freixedo said.

Estel·la.- I would ask you, how did this start? How was this loop created? But if there is no beginning or end in the universe, I imagine that here it is the same and then humanity has always been in this problem or situation. That is why I do not understand why they would tell you that you come to see the ascension or liberation of a planet if they themselves do not have those interests

Anéeka of Temmer.- Yes, although from another point of view it had to have been generated at some point, but it is very difficult to specify where. It is said that it was most likely the product of the devastation caused by the flood and its cataclysms. But as you know, the problem comes from further back. It is seen that at least those parts of the Federation that explain what happens in what I will call academies on the planets, do not understand well what is happening on Earth.

Estel·la.- What more misinformation.

Anéeka of Temmer.- Layer after layer.

Estel·la.- And can't one be an eternal node? The Earth will not always exist in 3D?

Anéeka of Temmer.- It is very possible. As Swarúu explained one day, somewhere in the universe and in time, there must be a place that is characterized by offering souls that kind of experience or there would be no opposite.

Cristina.- Sure, I understand, but also what you were saying that this is a loop and that if you don't see something else or you don't have to choose, it's difficult for us to get out of the loop, right? Although I understand that sleeping humans themselves allow no other option.

Anéeka of Temmer.- As Yázhi explains, it depends on each person individually and not on a traditional planetary liberation, because it is a problem of consciousness and perception.

Cristina.- Of course, I understand Anéeka, because each of us is perceiving everything in our own way.

Anéeka of Temmer.- It does suggest how to get out of that loop. Lots of mental energy. Again, as Yázhi explains, it is only achieved with more knowledge that will bring more evolution, not as isolated, stored or memorized data, but by processing for each person what that data means personally and for their own knowledge.

But as said above, they themselves, the humans, block themselves and do not allow them to have access to greater knowledge, because what they call advanced knowledge here on Earth is from universities and that is very limited and controlled, like in ancient Greece where they said that women should not be given knowledge, that giving the letter to a woman would be like reinforcing the poison to a dangerous snake. With that mindset they will be left in the loop of their own creation.

Estel·la.- I understand you, thank you, well, we have no choice but to move on.

Anéeka of Temmer.- Yes, keep going, just being who we are.

Cristina.- Yes, from here we will continue.

Anéeka of Temmer.- And here also for what corresponds to us. Although, we have our risks as well, it is not true that we are comfortably seated in a ship of love and light. It's hard here too, not the same, different, but it's hard too and I rarely share the difficulties of being here because it would hurt.

Estel·la.- Why?

Anéeka of Temmer.- I suppose it would hurt the image of another positive race. Or they would not believe such a thing as possible. For example, with everything and our very high technology compared to that of the Earth, we still have hard-to-fix malfunctions caused by corrosion in the systems, for example, life support systems malfunctioning, always something to repair, a constant risk. It is that many believe that in the Pleiades we manifest the ships with thought, no, they are manufactured with a lot of hard work, in groups and with time. As Yázhi says: "If you can manifest a ship with thought, you don't need a ship."

As I was saying, what happens on Earth is a phenomenally complicated, complex and multidimensional mess. And neither we nor anyone from these densities fully know what happens. We are all looking for answers. Depending on our point of attention and who we are the density. It does not matter if they are on Earth dodging syringes or in orbit dodging plasma shots or energy weapons. We all play our part in this tremendous cosmic mess and no one is exempt from a great risk, but we move on because that is what we are and we do it for who we want and for ourselves, because if we do not do it, we lose our souls.

Cristina.- And how do you think all this will continue to develop?

Anéeka of Temmer.- Raguel says that we are in the middle of a battle and that during any battle it will never be possible to know what is really happening, or who is winning. If it is not possible to know in a battle with weapons, even less so when the weapons are the media. Here we believe that we have no choice but to continue fighting as we can and with what we have because nothing is written, nor can we know what really happens. We can't know on any level, just get on with who we are.
